Case Study: Streamline data indexing and minimize Splunk licensing cost

Problem Statement

- Client use Splunk to search, monitor, analyse and visualize machine data.
- Licensing of Splunk is based on amount of data been index on daily basis.
- As the usage of Splunk by the stakeholders was quite extensive hence licensing breach was becoming troublesome for client.

Project Objectives

- To reduce cost by reducing License breach

Implementation & Outcome

- ✓ Our team gathered data and evaluated requirements and best solution for it.
- ✓ Partial indexing of logs was solution implemented
- ✓ It involved going through all the logs which were index then choosing the logs which are of higher importance based on stakeholder inputs and indexing that only
- ✓ This model minimized the license breach to great extent which in return saved cost.
